3) Case 3: The contractor shall replace bad horizontal and vertical chilled water pipe insulation in other pipe shafts, pipes that runs behind the wall and ceilings like those connected to air purge valves, FCU in the dining room, sleeping bedrooms and other pipes supplying water to wall type FCU. This work includes sealing all gaps around the area (minimum of 11 locations shall be opened and sealed) and application of wool insulation material and/or dry boards partitions if necessary. The contractor shall carefully wrap the insulation with plastic especially on the connection point between the old insulation and the new insulation. The case 4 shall be calculated in per meter length basis including both for replacement of insulation and drywall. The contractor shall complete the work in 3 working days. The Contractor shall provide the price of the Case 3 based on one set of PHG3B type (G5022) apartment with approximately 45 linear meters of pipe insulation and associated drywall replacement work.

Photo 6: Case 3

3) Case 4: The contractor shall replace horizontal and vertical pipes found to be in bad condition after the removal of insulation. The scope of work shall be calculated in per meter length basis. Pipe size is 50mm diameter in maximum and made of Steel Galvanized Pipe (SGP). The contractor shall complete the work in 2 working days. Leak check, including enough and proper air purge and flushing of the rusty chips & water shall be performed accordingly upon completion of the installation.
